- **Clean burning**, with no wax left on sides of container
- **Superior quality** and ounce-for-ounce more **affordable** than leading retail candles
- Burn slowly, consistently and **last longer**
- Reusable containers

Our Jar Candles

Our candles are made of 100% natural soy wax, which is the best burning, most natural wax available. This wax is produced from soybeans grown by American farmers.

We use fragrance oils infused with natural essential oils. Our scents are strong and have excellent hot and cold throw.

We use quilted canning jars with brushed silver lids. They look great in kitchens and cabins but can be used anywhere. We use wicks with a cotton and paper combination that ensure our jars burn cleanly, with no leftover wax on the side of the jar. These wicks are semi-self-trimming, reduce mushrooming, soot and smoke.

Soy wax washes out very easily, so when the candle has finished burning, wash out with hot soapy water and you'll have a reusable container.

Jars made in the USA.

Candles hand-poured in Minnesota.
